

# Stop **feeding** the **bacteria** that **cause mastitis.**

teat dips

Fight Bac

**45°**  
**nozzle**  
FOR FULL  
COVERAGE

See the white areas in these x-rays? That's milk. Regular teat dips can leave milk residue that actually feeds mastitis-causing bacteria. Fight Bac's aerosol action blows away residual milk and completely disinfects.

Fight Bac is cost-effective too. Two cans cost the same and treat as many cows as a gallon of dip. Plus, less mastitis means higher milk premiums and lower medical costs. Visit [www.FightBac.com](http://www.FightBac.com) to learn more about Fight Bac and how research proves it controls mastitis better than traditional dips.
